

## Just like his daddy, Lucas would really like to race when he grows up.

Little Lucas was born with a heart defect requiring six surgical interventions, including three open heart surgeries.

In 2007, his father, Alexandre, along with seven other cyclists from the competitive circuit in Quebec, took the initiative to form the En Coeur cycling team in order to help children with heart conditions and their families. They are now giving you the opportunity to wear their team colours by purchasing En Coeur Foundation cycling apparel. All proceeds raised will help to support families like Lucas' overcome their hardships. For more information or to order cycling apparel, please visit:
