LOUIS GARNEAU 0 DEGREE ERGOGRIP

PRICE: **\$180** WEIGHT: **1,050g/pr. (size 44)** INFO: louisgarneau.com

A winter shoe not only has to keep cold out, but it also has to keep moisture at bay. And that's just what the Louis Garneau 0 Degree ErgoGrip does. The shoe protects well down into the low 20s and even high teens, and it keeps your feet dry when you stomp through puddles and sloppy mud. It has a water-resistant leather base with molded plastic heel and toe cups. Inside, there's an inner bootie that laces tightly around the ankle for additional element protection. It'll provide hours of protection in the rain and the ErgoGrip outsole lugs offer great traction during dismounts.
